

NIAC POLICY CHANGE

NASA has clarified their position regarding foreign participation in NIAC sponsored Call for Proposals (CPs). Unfortunately, foreign entities at any level of participation are not eligible for funding from the NIAC. This includes proposals from U.S. entities that include foreign entity participation.

This policy will apply to CP 99-03 and subsequent CPs unless modified and/or rescinded by NASA.

The NIAC regrets any inconvenience this may cause to any foreign source planning on directly submitting or indirectly supporting a response to a NIAC CP.

1. Please make the following changes to CP 99-03:
 - a. On page 2, delete in its entirety the sixth paragraph from the top.
 - b. On page 2, insert the following paragraph for the previous one deleted:

This NIAC CP is a solicitation for advanced aeronautical and/or space concept studies. Participation in these studies is open to all categories of domestic individuals and organizations. Foreign entities at any level of participation are not eligible for funding from the NIAC. This includes proposals from domestic entities that include foreign entity participation.

2. The due date for proposals in response to NIAC CP 99-03 remains unchanged (January 31, 2000).
